Resume Objectives

Highly motivated Frontend Engineer passionate about building accessible user interface with experience 21+ projects seeking full-time developer position to leverage strong skills and contribute to a collaborative team environment.

Work Experience

Frontend Developer Intern

January 2024 - Present

Codsoft, New Delhi India, Remote

- Single-handedly transformed a complex Figma landing page design into fully functional HTML, CSS and JavaScript code with a tight 48-hours deadline.
- Leveraged the CSS grid system to create full responsive user experience across all devices. This resulted in 25% increase in mobile conversion rate and improved user satisfaction.
- Developed a responsive tribute webpage using HTML and CSS, guaranteeing a consistent visual experience across all browsers, ensuring a seamless user experience for all visitors, regardless of their device or platform.
- Implemented effective time management strategies that boosted development efficiency by 21%. This ensured consistent on-time delivery of projects, meeting all requirements and exceeding expectations.
- Optimized user experience by integrating an API for dynamic icon fetching. This innovative approach resulted in a 26% reduction in page-load time, leading to a faster and more engaging experience for users.

Frontend Developer

July 2022 - February 2023

CoinDrance, Lagos Nigeria, Remote

- Championed a collaborative effort with the UI/UX team to develop a modern UI landing page. This resulted in a significant 22% increase in conversion rates, demonstrating a successful user experience and improved business outcome.
- Single-handedly translated a UI/UX design into a fully functional landing page using ReactJS and Tailwind CSS within one-week timeframe. This accomplishment demonstrated my proficiency in these modern frameworks and my ability to deliver high-quality work efficiently.
- Spearheaded performance optimizations that slashed page-load time by a remarkable 42%. This resulted in a significant 71% boost in web traffic, demonstrating a successful user experience improvement and increased brand visibility.
- Spearheaded a landing page redesign that ignited a remarkable 70% increase in stakeholders and investors interest. This data-driven approach directly translated into heightened brand awareness and potential funding opportunities, demonstrating the success of the redesign and its alignment with audience needs.
- Championed a rigorous testing process that included meticulous bug detection and performance optimization. This resulted in a significant 40% increase in overall application efficiency, leading to a seamless user experience and improved user satisfaction.
- Streamlined the developer workflow by integrating API for real-time currency exchange data. This innovative solution resulted in a remarkable 56% improvement in developer experience, allowing them to focus on core functionalities and accelerating development cycles.

Selected Projects

Personal Website: mke.vercel.app (for additional informations and projects)

Pinterest Clone App

- Leveraged Next.js and Firebase to develop a full-stack web application empowering users to create and share inspirational content through images. This user-centric application has the potential to foster a strong user community and drive user engagement.
- Utilized the power of Next.js and React to create a highly performant and user-friendly web application. This maximized the capabilities of these frameworks, resulting in seamless user experience.
- Implemented SEO best practices and performance optimization by leveraging semantic HTML tags, Next.js Image component, and strategic meta tags. This resulted in a measurable improvement in web performance, which can lead to higher search engine ranking and increased organic traffic.

Utilized: React.js, Next.js, Next-Auth, JavaScript and Firebase
