Career Objective

An Individual driven by passion for coding, I've built 18+ personal projects, tackling challenges like Development strategy, performance ,external integration and other challenges. Through this self journey, I've honed my skills in Java-script and Typescript and possess a relentless drive to learn
and contribute to a collaborative team environment.

Work experience

Front-end Developer Intern

Codsoft, New Delhi India, Remote

January 2024 - Present

- Revamped Figma landing page to HTML,CSS and JavaScript code in 48 hours.

- Implemented the CSS Grid system to ensure seamless responsiveness across all devices,enhancing user experience.

- Crafted a responsive tribute webpage using HTML and CSS. Ensured a seamless experience across browsersfor consistent visual tribute.

- Demonstrated effective time management skills which increased development by 21% and meeting project requirements and deadlines.

- Integrated the an API to dynamically fetch icons,resulting in a notable 26% reduction in page-load time for an optimized user experience.

Front-end Developer

Codsoft, New Delhi India, Remote

July 2022 - February 2023

- Collaborated effectively with UI/UX team to craft a modern UI landing page, resulting in remarkable 22% increase in conversion rates

- Independently converted the UI/UX design using reactjs and tailwindCSS within a 168 hours frame,- showcasing both my proficiency and speed in development.

- Implemented optimizations techniques that led to an impressive 42% reduction in page-load time, sub- sequently driving a substantial 71% increase in web traffic.

- After makeover of landing page, the company experienced a remarkable 70% surge in interest from stakeholders and investors, reflecting the success of redesign.

- I Ensured a seamless user experience by meticulously testing the application for bugs and optimizing operating speed, resulting in a notable 40% increase in overall efficiency.

- I Integrated an API to fetch real-time currencies exchange and data, contributing to a remarkable 56% improvement in developer experience.

Software Projects

Personal Website: *mke.vercel.app* (for additional informations and projects)

Pinterest Clone App

- Developed a full-stack web appilcation using Nextjs and Firebase that allows users to easily create and share their insipiration through images

- Leveraged the robust capabilities of Nextjs and React, Unlocking the full potential of these tech-stack to build a seamless user experience

- Implemented Next-Auth for secure and efficient user authentication.

- Utilized and used HTML semantic tags and Nextjs optimized image component and meta tags which increased web performance.

- Incorporated Firebase as database to securely store user's ideas and information,contributing to a reli- able and scalable infrasturcture.

- *Utilized*: Reactjs,Nextjs,Next-Auth,JavaScript and Firebase

Skills

Software: (*proficient*): HTML, CSS, JavaScript, TypeScript, Reactjs, Nextjs, Figma, Adobe XD, Firebase (*familar*): Python, Nodejs, MongoDB, Next-Auth

Achievements: FreeCodeCamp Front-end Developement Libraries Certified & JavaScript Algorithims and Data Structures Certified
